USB Parallel Printer Adapter Cable

Highlights

- Connects a parallel printer to a USB port
- No software required
- Compatible with dot matrix, inkjet, and laser printers

Description

With our USB Parallel Printer Adapter it's a snap to connect parallel printers to the USB port on your PC or Mac. It is compatible with hundreds of dot matrix, inkjet and laser printers and works with standard printer drivers.

PC Users:

If your new PC does not have a parallel port - there's no need to discard your parallel printer. It's easy to use your parallel printer on a USB port. Even if you still have a parallel port, connecting your printer to the USB port leaves the parallel port free for ZIP drives or other parallel devices. Using your USB port for a printer connection also provides a convenient way to connect multiple printers to your PC.

Mac Users:

Our proprietary Printer Configuration software makes it simple to add your parallel printer to the Print Center under Mac OS X (10.2 or later).

System Requirements

- **Windows:**

- An available USB port
 - Windows 2000/XP

- **Macintosh:**

- An available USB port
 - Mac OS 8.6 (or later) or Mac OS X (v10.3 or later)
 - USB to Parallel compatible printer driver (see web site for details)

- **Important Note:**

- This cable can only be used with Parallel Printers. This cable is not compatible with parallel security dongles.

When running Windows or Mac OS X, this product is compatible with hundreds of parallel printers from HP, Epson, Canon, Lexmark and other manufacturers.

Support under Mac OS 8.6 and 9.x is limited to Epson Stylus Printers.

This product is not designed for use with other types of parallel devices (e.g. hard drives, security dongles, scanners).

Package Includes

- UP-6C cable
- Printed Quick Start Guide

Features

- Connects to USB port on PC or Mac
- Connects to centronics port on your parallel printer
- Works with standard Windows printer drivers
- Works with CUPS printing engine in Mac OS X
